File Security-6

MEMORANDUM FOR: Director, National Foreign Assessment Center
FROM: Deputy Director of Central Intelligence
SUBJECT: Security Violations

Statistics on security violations, compiled by the Office of Security for May 1979, reflect that the National Foreign Assessment Center had only one violation during the month. This was the best record of any major CIA component for this period. Considering the NFAC complement of more than [redacted], this is a fine performance. Naturally, the goal of no security violations is one we should all seek. Nevertheless, it is a pleasure to know that NFAC has come so close to that ideal. My congratulations to you and to all members of NFAC on this vigorous effort to maintain the security of our classified information.
